A perfectly balanced natural mineral water to help you stay healthy

Sierra Cazorla functional drinks
much ^{more} than water

Sierra Cazorla Natural Mineral Water have developed a range of functional drinks which are made using their own mineral water and natural ingredients which help you take care of yourself naturally.

Evo. A diet isotonic drink, it hydrates with just half the sugar and calories of other isotonic drinks without losing that delicious lemon taste.

TeaW. Natural antioxidants, sugar free. For those who take care of themselves.

ffiB. Soluble fiber, no added sugar. For the proper working of your intestines, it works right from the beginning.

Beta6. Suitable for diabetics. Sugar free. It contains polifenols and bioflavonoids. A balanced diet and regular sports activities help reduce sugar and lipid levels in your blood.

Sierra
Cazorla
Natural Mineral Water

A finely balanced mineral water like no other

Sierra Cazorla Natural Mineral Water has such a balanced composition thanks to the minerals in the area that are dissolved in to the water before it rises to the surface.

It's not hard to find water with acceptable levels of certain components. What is really hard to find is water with such a perfectly balanced mineral composition as Sierra Cazorla, and therein lies the difference as no other water can boast these characteristics.

NATURAL MINERAL WATER ICE CUBES

Aqua cubes

SODIUM Water that is low in sodium is especially suitable for preparing children's food. It is also ideal for low sodium diets and it helps to keep your blood pressure down.

MAGNESIUM Magnesium helps to bind calcium and phosphorous to your bones and teeth. It acts to control your intestinal flora and helps your intestines and heart function properly.

*Recommended amounts: 17-35 mg/litre

BICARBONATES Powerful digestive properties. Bicarbonates act to neutralize gastric secretions, so they stimulate and encourage proper digestion. Bicarbonates also helps to regulate the concentration of insoluble substances in your kidneys.

*Recommended amounts: 200-500 mg/litre

CALCIUM Calcium plays an important role in strengthening your teeth and bones. It is specially recommended during periods of growth and in old age, by helping to protect your bones.

*Recommended amounts: 30-90 mg/litre

* According F. Kozisek in his report Health Risks From Drinking Demineralised Water, drawn up by the World Health Organization, Geneva, 2004.
